Yulia Kovalevskaya

Product designer

Poland · yuliakovalevsk@gmail.com · LinkedIn: Yulia Kovalevskaya · Portfolio: Yulia-Kovalevskaya

Designer with 4 years of experience in mobile and web product design across **fintech, fitness, and B2B sectors.** Specialise in building design systems, conducting UX research, and translating **implementing business goals into intuitive interfaces.**
Impact: **implemented a design system** that accelerated the development cycle by 18%, optimised user flows that increased conversion by 12% and reduced user errors by 14%. Actively **integrate AI tools** (ChatGPT, Gemini, Claude, NotebookLM) into the design workflow. Comfortable working in **cross-functional Agile teams and presenting solutions to stakeholders.**

Hard skills

Design Tools: Figma (including Figma AI), Adobe Photoshop, Illustrator, Miro, Webflow, Canva, Cinema 4D, AutoCAD

AI Tools: ChatGPT, Gemini (including image generation), NotebookLM, Claude

Design Competencies: UX Research, Design System creation (UI Kit, components, tokens, libraries), Adaptive & Responsive Design, UX Analysis, Wireframing & Prototyping, HIG & Material Design, Visual Design

Soft skills

Systems thinking, strong UI skills, analytical mindset, strategic approach, cross-functional collaboration, effective teamwork, openness to feedback and criticism, stakeholder communication, product-oriented approach

Languages

English — B2 (Upper-Intermediate)

Work experience

Beetrail Group — *February 2023 – Present*

PRODUCT DESIGNER

IT company delivering mobile and web solutions for businesses and startups (Flutter, Dart, Firebase) across fintech, fitness, and B2B domains — from MVP to release and ongoing support.

Contributed to the creation of mobile apps and web solutions in fintech, fitness, and B2B sectors. **Conducted UX research, developed user scenarios, and implemented design systems,** which led to a 12% increase in conversion, a 14% reduction in user errors, and an 18% acceleration in the approval cycle.

- Conducted UX research and competitive analysis, built customer journey maps, identified friction points — reduced user flow steps by 23% and increased conversion by 17%
- Designed and implemented a Figma-based design system (UI Kit with tokens, components, and libraries) using Ant Design; ensured visual consistency across products and reduced design-to-development handoff time by 30%
- Produced wireframes, interactive prototypes, and solution presentations for stakeholder reviews — cut revision rounds and shortened time-to-market
- Ran usability testing and UX audits; optimised key scenarios, cutting user errors by 14% and improving retention by 9%
- Integrated AI-powered features into user flows, contributing to a 20% increase in user engagement
- Presented and defended design decisions to stakeholders; iterated based on feedback to ensure successful implementation
- Worked within Agile cross-functional teams: participated in grooming sessions, design reviews, and sprint planning

Avectis CJSC — *April 2022 – January 2023*

DESIGNER

A company with over 30 years of experience, specializing in creating IT infrastructure, data centers, information security systems, and multimedia solutions for corporate clients.

Participated in the **development of B2B products** and interfaces for corporate systems; **created a UI Kit and branded style elements**, accelerating the design process by 15–17% and reducing development coordination time by 14%.

- Contributed to B2B product design for corporate systems; built a UI Kit and branded style elements that accelerated the design process by 15–17%
- Created wireframes and detailed interface mockups in Figma, Photoshop, Illustrator, and AutoCAD — increased design output speed by 15% and improved visual quality
- Prepared structured design documentation (handoff materials), reducing developer coordination and approval time by 25%
- Delivered responsive B2B web interfaces with focus on typography, adaptability, and corporate usability standards
